New Frontiers in BioInspiration
Zoom Seminar Series
June 15, 22, 29; July 6, 1-2:15PM
Organized by Al Crosby and Duncan Irschick

Free Registration: https://umass-amherst.zoom.us/meeting/register/tJckc-6tqT0sGtlkdt38ueS1Sz26I2VH91v9

Apply for a 10 minute presentation: Interested grad students, postdocs or faculty in the area of bioinspired research are encouraged to apply to give a contributed talk by sending an abstract of less than 300 words to CEM Program Manager, Jennifer Green, at jgreen@mail.pse.umass.edu

Building upon the success of the 2019 program, we are pleased to announce a New Frontiers in BioInspiration Zoom Series to encourage intellectual stimulation and promote interdisciplinary collaborations.

Invited Speakers:
June 15: Andrew Biewener, Lyman Professor of Biology, Harvard University, "Maneuvering flight in birds: exploring visual clues and guidance laws linked to bioinspired UAV flight through cluttered environments"
June 22: Joan Edwards, Samuel Fessenden Clarke Professor of Biology, Williams College, "Bioinspiration from ultrafast plants"
June 29: Reika Katsumata, Assistant Professor of Polymer Science and Engineering, University of Massachusetts - Amherst, "Ultrasmall nanoparticles meet big molecules: dynamics to structures"
July 6: Patricia Brennan, Assistant Professor of Biology, Mount Holyoke College, "Genital coevolution and its impact on material properties of vaginal tissues"
